## EB&GO: Master Program in Economic Behaviour and Governance, M.Sc.

Behavioural economics has led to path-breaking insights refining our understanding about human behaviour in economic contexts. It helps improve the governance of economic processes in a wide range of applications from environmental policy to public finance.

In the Master program **Economic Behaviour and Governance (EB&Go), M.Sc.** students learn to apply insights from behavioural economics to analyse and design micro-, meso- and macro-level governance tools and policies. They acquire up-to-date theoretical knowledge as well as profound empirical skills.

Kassel is a dynamic city located in the heart of Germany and surrounded by a beautiful landscape. Home to documenta, the world's most important contemporary arts exhibition, Kassel is open-minded, diverse and yet affordable.

*Claes Oldenburg, Spitzhacke, documenta 7*
