Do you want to have more confidence and impact in your presentations? Do you want to relax and enjoy presenting your research to your team, in department meetings and at conferences? This workshop uses a mix of practical exercises, discussion and video feedback to help you get your message across with confidence and clarity.

CONTENT
• Gain an insight into the subtleties of verbal and non-verbal communication, energy management and the balance between internal and external awareness  
• Assess your own presentation strengths and weaknesses and try out new/more successful communication strategies where appropriate  
• Develop a critical awareness of effective presentation style to give and receive constructive feedback  
• Build on and practice the English phrases of presentation  
• Learn strategies for dealing with unexpected or difficult situations, e.g. answering questions, technical problems, audience management  
• Design and use PowerPoint slides more effectively  
• Develop confidence and enjoyment in public speaking
