Bollinger + Grohmann Ingenieure is a Frankfurt-based engineering consultancy with more than 30 years of national and international building experience and expertise, also located in Berlin, Munich, Vienna, Paris, Oslo, Rome and Melbourne.

We conceive structure as an integral part of architecture. The overall performance of an architectural project results from negotiating and balancing a complex network of multifaceted, interrelated requirements.

To enhance our team in Oslo we are currently looking for a:

**INTERN**

**Your tasks** include the support of the team referring to:
- assistance in structural design and sustainability concepts
- 3d-modelling/ BIM modelling
- development of illustrations/ overview drawings
- creation of presentations

**Your profile**
- knowledge in the handling with Rhino and preferably with Grasshopper, Revit or Autocad and Adobe
- general interest for construction and sustainable architecture
- design, graphics, animation

**We offer**
- Assistance in interesting and innovative national and international projects
- Working within a young and open team structure
- Collaboration with renowned architectural offices
