

Department Organic Food Quality and Food Culture

Module: IO3 / F42

Food quality and organic food processing

Time: Wednesday, 14.15h bis 19.00h

Location: H13

Date: 13.04.2022 – 13.07.2022

Content:

- The lectures are based on the definitions of organic food quality from many different perspectives in that the whole process „from farm to fork“ will be discussed based on different foods.
- We will analyse which factors influence organic food quality during farming and processing and at which critical control points quality losses can be estimated.
- Beside the lectures we will deepen the questions of process, measurement and regulation by observing also what food processing companies are doing in order to safeguard quality. Students will be organized into groups of four and each group will be expected to produce a homework assignment.

Time planning and details of the course will be discussed on the 13.04.2021. Enrollment will be organized through the uni kassel edu-campus web site.
