

Module Announcement
E 36 - Institutions and the Food System – Winter term 2022
Thursday, 08:30 – 12:30 (end t.b.d.) Uhr, Start 27.10.2022

Please, register in advance via ecampus: https://ecampus.uni-kassel.de/qisserver/pages/cs/sys/portal/hisinoneIframePage.faces?id=qis_vvz_anonym&navigationPosition=link_qis_vvz_anonym

Room: H 12, consult moodle for Details

Adapted by Christy Shi, Center for Environmental Farming Systems.
From: Wilkins, J. and Eames-Sheehy, M. Discovering the Food System: An experiential learning program for young and inquiring minds.
Cornell University, Departments of Nutritional Science and Horticulture. <http://www.discoverfoodsyst.com/edu/>

Contents: What is the food system approach and what are actors and processes we observe there? Institutions, understood as social rules, are core to these issues. They allow actors to collaborate in resource management and agricultural production and are subject of policies. The course introduces how institutions facilitate collective action, their role in contracts, cooperatives, value chains, policies, property rights and in the food system in general. It connects institutional analysis to the analysis of ecosystem services. **Institutional Analysis will be practiced** throughout exchanges with policy-makers and stakeholders shaping the European food system, e.g. throughout an excursion to Berlin.

pixers

When we work together... 

Teaching methods: Lecture and discussion, interactive presentations, literature discussions, group work, exchange with policy makers and practitioners, excursion to Berlin
Certificate: Readings, continuous group work on course-related questions + presentation or essay or oral exam
