

4th Global Conference of the One Planet network's Sustainable Food Systems Programme

THE TRANSFORMATION WE NEED

Towards the 1st Stocktaking Moment: Emerging from global crises by shaping sustainable, resilient, healthy, and inclusive food systems*
24th – 27th April 2023 in Ha Noi, Viet Nam & online

Virtual side event on 24th April at 18:00 – 19:30 (ICT)

Transforming territories: The approach of Organic Districts as living laboratories for inclusive sustainable food systems

Register now to Join Us:

<https://organicfoodsystem.net/portfolio/upcoming-virtual-event-4th-global-conference-of-the-sfs-programme/>

We share with you how Organic Districts transform food systems locally and realise the economic and sociocultural potential of the territory and its communities based on organic principles and practices. Transformation at territorial level, with sustainable, inclusive communities linking together is the mindset and dynamic action that we need around the world right now.

As part of the 4th Global Conference of the SFSP, this virtual side event invites you to hear evidence from the four corners of policy, science, training, and practice, as well as see snapshots from diverse Organic Districts in the Philippines, Portugal, Tunisia, Argentina, Mediterranean, Nordic and Baltic Sea Regions.
