

**Booklet 9/September 2000**

**Tönsmann, F. und M. Koch (Hg.):**

**River Flood Defence  
(3 volumes) in English language**

**VOLUME 1:**

**SECTION A: INTRODUCTION**

Dietzel, W.: Opening Remarks. Andres-Müller, H.: Greetings. Koch, M.: Natural Hazards and Disasters: Origins, Risks, Mitigation and Prediction,

**SECTION B: HISTORY OG FLOOD DEFENCE**

Hoffmann, A.: Floods and their Origin in the Medieval World of Thought. Wang, Z.-Y.: History of Flood Defence in China – with Particular Reference to the Yellow River. Chowdhury, J. U.: Bangladesh, a State at Permanent Flood Risk. Schmidt, M.: Flood and Flood Protection in Germany 850 – 1850. Vischer, D.: Swiss Pioneers of Flood Protection. Deutsch, M., K.-H. Pörtge and H.-G. Spanknebel: The Development of Flood Warning and Messaging Service in Thuringia. Toensmann, F.: About the History of Flood Defence: The Northern Hesse Example.

**SECTION C: HYDROLOGICAL DATA AND PRECIPITATION**

Frühwald, D.: Quantitative Precipitation Forecasting Based on the New NWP System of DWD. Asabina, E.: The Frequency Analysis of Extremes with Different Genesis in Plain Rivers of Russia. Denisov, Yu. M. and A. I. Sergeev: Method of Mountain Rivers Meltwaters Maximum Discharge Computaion. Depettris, C., A; E. M. Mendiondo, J. J. Neiff and H. R. Rohrmann: Flood Defence Strategy at the Confluence of the Parana-Paraguay Rivers. Lobanova, H. V.: Are Recent Catastrophic Floods on the Lena River in Yakutia a Response of Modern Climate Change? Querner, E. P., van J. B. M. Acker and R. P. Moens: Analysis of Catchment Response for Regional Water Systems in the Netherlands. Siedschlag, S.: Continuous Measurement of Discharge by Ultrasonic Flowmeters. Wang, Ru-yih and Meng-ying Li: Outlier Detection and Minimum Required Length of Records for

Estimation of Extreme Precipitation. Goulpie, P. and J.-A. Hertig: Extreme Precipitation Over Complex Topography with a Modified Navier Stokes Solver. Implementation of a 3 Phases Microphysics Parameterization.

## **SECTION D: PRECIPITATION-RUNOFF MODELLING**

Schultz, Gert A.: Rainfall-Runoff Models for Flood Management Using Remote Sensing Data.

### **Climate Changes**

Gelder, van Pieter H. A. J. M., V. A. Kuzmin and P. J. Visser: Analysis and Statistical Forecasting of Trends in River Discharges under Uncertain Climate Changes, Lehner, B., J. Alcamo, P. Döll and F. Kaspar: Towards a Global Perspective on the Risk of River Floods.

### **River Flow Forecasting**

Bastin, G. and L. Moens: Hydromax: A Real-Time Application for River Flow Forecasting. Ehret, U., A. Bárdossy and H. Gysi: Stochastic, Radar-Based Short Term Flood Forecasting. Sorooshian, S., H. Gupta and D. P. Boyle: Improving Calibration of Flood Forecast Models: A Multi-Criteria Approach. Petkovski, L.: Development of an Information System for Flood Defences Using a Simulation Model for Operational Management.

### **Precipitation-Runoff Modelling**

Bott, W., T. Hofmann and D. Schenk: Water Management at Forest Sites – Impact of Forestry and Hydrologic Measures. Chang, Tsang-Jung, Ming-Hsi Hsu and Shiuan-Hung Chen: Urban Stormwater Modelling for Drainage Basin with Sewer System. Kawatani, T., M. Saito and E. Asare-Boafo: Identification of Tank Model Parameters for Predicting Probable Maximum Peak Discharge Caused by Rainfall with a Prescribed Return Period. Michele, De C., R. Rosso and G. Salvadori: Scaling Laws and Derived Distribution of Maximum Annual Flood. Lamb, R., J. Crewett and A. Calver: Progress in the Spatial Generalisation of ‘Continuous Simulation’ Flood Frequency Modelling. Schlenkhoff, U. and D. Rieger: Modelling of Flood Events in Urban Areas. Swain, P. C., Ch. Seshachalam and N. V. Umamahesh: Flood Estimation: A Neural Network Approach.

### **Hydraulic Modelling**

Klenov, V. I.: Application of River Basis Simulation for Flood Hazard Assessment. Morvan, H., G. Pender, N. Wright and D. A. Ervine: Three-Dimensional Modelling of the Flow Mechanisms in Flooded Meandering Channels. Parzonka, W., L. Radczuk, R. Eliasiewicz and M. Mokwa: Modelling of the Flood Passage Through Wrocław Hydrotechnic System.

### **Divers**

Marengo, H.: Extreme Events Presented in the Mexican Southeast During 1999. Pfaundler, M. and P. Burlando: Identification of Homogeneous Regions for Flood Frequency Regionalisation with the Region of Influence Approach in Switzerland; to what Extent Spatial Proximity Alone can be Used as Basis for the Information Transfer? Wolf-Schumann, U.: Floodplain Hydrology – An Investigation of the Effects of Surface Flooding on Ecology, Soil Humidity and Parcelling of Agricultural Land in Valley Floodplains of Lowland and Low Mountain Waters.

## **SECTION E: POLLUTANTS AND DISEASE PATHOGENS**

Borchardt, D., Frank Toensmann and M. Homeier: Pollutants and Disease Pathogens in Floods - an Introduction. Breuer, B.: Concentration of Heavy Metals During the January 1995 Flood in Kassel. Vollmar, S., K. Träbing and A. Dittrich: Turbulence Induced Penetration of Near Bottom Water into the Porous Medium – Experimental Study. Westrich, B.: Particulate Pollutants in Surface Waters.

## **SECTION F: FLOOD RISK**

Berz, G.: Flood Disasters – Lessons from the Past, Worries for the Future. Plate, Erich J.: Flood Management as Part of Sustainable Development.

### **Historical Floods**

Bhowmik, N. G.: The 1993 Great Flood on the Upper Mississippi and Missouri Rivers in the USA: Causes, Effects and Implications. Bjarsch, B.: Extreme Floods of the Oder, Spree and Peene Rivers. Chbab, E. H., M. T. Duits and J. M. van Noortwijk: Bayesian Frequency Analysis of Extreme River Discharges. Dong, Zhiyong and Jun Li: On 1998 Extraordinary Floods in Yangtze River Valley of China. Ciepielowski, A. and K. Banasik: Flood 1997 in Poland, Lessons from the Disaster. Ferrari, E., G. Ivoine and O. Petrucci: Defence from Hydrogeologic events in Ne. Calabria: An Example of Combined Use of Geomorphologic, Hydrologic and Historical Data.

### **Flood Plains and Flood Plain Management**

Beffa, C.: A Statistical Approach for Spatial Analysis of Flood Prone Areas. Badrul, Islam and Sultan-UI-Islam: Floods in Bangladesh: A Geo-Environmental Assessment. Beyene, M., C. Rubin and M. Dörr: Flood Plain Mapping with Cellular Algorithms for One-Dimensional Water Level Profile Models. Chen, Shiuan-Hung, Wei-Hsien Teng and Ming-Hsi Hsu: A Grid-Refined Flood Inundation Model. Maione, U., P. Mignosa and M. Tomirotti: Synthetic Design Hydrographs for River Flood Management. Neiff, J., J., E. M. Mendiondo and C. A. Depettris: ENSO Floods on River Ecosystems: Catastrophes or Myths? Sönnichsen, D. and Th. Rieck: Statutory flood plains for flood prevention.

### **Flood Defence**

Chowdhury, J. U.: Experience with Flood Control Projects in Bangladesh. Homeier, M. and F. Toensmann: Flood Channels and Flood Culverts in Northern Hesse.

### **Floods and Sediments**

Faeh, R.: Impact of Sediment Transport on Flood Risk Estimations. Sobirey, A. and F. Toensmann: The Influence of River Morphology on Water Level Computations of Low Mountain Range Brooks during Flood Events.

### **Flood Management at Dams**

Aureli, F. and P. Mignosa: Two-Dimensional Flows Due to Dam or Levee-Breaking. Bergmann, H., H. Breinhälter, O. Hable and R. Krainer: Flood Management at Dams with Consideration of the Reservoir Operation. Rösch, Thomas and Frank Toensmann: Minimizing the Influence of Large Reservoirs on Downstream Water Quality by Turbine Venting. Saad, M. B. A.: Toshka Spillway as a Complementary Safety for the High Aswan Dam.

### **Urban Drainage System**

Nieschulz, K.-P., Jadranka M., M. Thomas, W. Schilling and Theo G. Schmitt: Risk Management of Urban Drainage Systems - Simulation and Optimisation –(EUREKA PROJEKT E!2255 RISURSIM).

### **Coastal Floods**

Thomalla, F., J. Brown, I. Kelman, I. Möller, R. Spence and T. Spencer: Coastal Settlements at Risk: A Study of England's East Coast.

### **Strategies/Concepts**

Chand, Er. Ram: Flood Management Strategies in Punjab – India. Henneberg, S. Ch.: An Integrated Plan on Flood Defence for the River Weser. Kreil, A.: Flood Control in the Catchment Area of the River Fulda, Plans of the Past – Prospects for the Future. Lobanov, V., A.: Strategy of Flood Computations and Flood Risk Estimation in Changing Conditions.

## **VOLUME 2:**

### **SECTION G: NEW DEVELOPMENTS IN FLOOD PREVENTION**

Samuels, P. G.: An Overview of Flood Estimation and Flood Prevention.

### **Hydrology**

Ayros, E. , A. Bárdossy and M. Sommer: Combination of Regional Information and Rainfall Runoff Modelling for the Estimation of Design Floods. Darama, Y.: Prediction of Flood Frequencies by Stochastic-Deterministic Hydrologic Model. Jakob, D. and D. W. Reed: Improving the Accuracy of Estimates: A new Method for Statistical Flood Frequency Estimation in the UK. Kulkarni, A. K., B. N. Mandal, R. B. Sangam, N. R. Deshpande and S. S. Nandargi: Estimation of Probable Maximum Precipitation (PMP) or Extreme Point Rainfall over India. Mkhandi, S. H. and F. Mtalo: Development of a Robust Procedure to Predict Flood Magnitudes in Pangani River Basin in Tanzania. Reichel, G. and G. Baumhackl: A new Simulation Tool for Flood Routing in Man-Controlled River Systems Focusing on to the Needs of Operational Hydrology.

### **Hydraulic**

Forbes, G. and G. Pender: The Application of Enhanced Conveyance Calculations in Flood Prediction. Jesowicki, J.: Modelling the Flood Transformation in River System with Hydrotechnical Infrastructure. Mai, S. and N. v. Lieberman: Risk Assessment of Coastal Defences. Renner, E., D. Ackermann, S. Kaden and S. Reichert: Flood Model for the Elbe Marshland of Hamburg. Sulzer, S., P. Rutschmann and W. Kinzelbach: Determination of Flood Discharge in Rivers with an Inverse Numerical Model.

### **Prevention**

Koch, M., R. Marquardt, Th. Rauschenbach and P. Schmidt: An Early Warning and Disaster Management System for Flood Control of the Commune Breitung/Thuringia. Kuzmin, Vadim and Pieter H. A. J. M. van Gelder: The Principles of Catastrophic Flood Forecasting. Oberle, P., S. Theobald, O. Evdakov and F. Nestmann: GIS-Supported Flood Modelling by the Example of the River

Neckar. Singh, R. B.: Flood Prevention and Mitigation in Disaster Prone Regions of India: Case Study.

### **Flood Defence**

Aurada, K. D. and R. Rödel: Flood Protection as Hybrid Systems. Mendiando, E. M., R. T. Clarke and F. Toensmann: River Restoration, Discharge Uncertainties and Floods. Patt, H.: Constructive Measures for the Flood Protection of Urban Areas. Robinson, A. and B. Gerken: The Significance of Floodplain Channels to Floodplain Restoration and Flood Mitigation. Scharaw, B., Th. Westerhoff, H. Puta and J. Wernstedt: Model Based Management of a Reservoir System.

### **Strategies/Concepts**

Marenbach, B.: Estimation of Flood Peak Reduction Caused by River Revitalisation Measures Using Catchment Characteristics. Mirza, M. Monirul Q.: Flooding in Bangladesh Under Global Warming and Future Flood Defence. Zimmermann, U. and F. Sieker: Flood Mitigation by on Site Storm Water Management in the Catchment of the River Saar. Toensmann, F.: The Kassel Concept for River Flood Defence.

### **SECTION H: IRMA SESSION**

Laman, J.: Supporting Flood Prevention Along the Rhine and the Meuse. The IRMA-Programme: Preliminary Results and Recommendations. Bernreuther, A., B. Merz, J. Wald and J. Chmielecki: Risk Analysis Methods as Basis for Flood Design in the Seckach/Kirnau Watershed. Bovée, P.: Sustainable Flood Prevention Needs a Fundamental Solution. Gräff, H.-J.: Spatial Planning and Precautionary Measures in Vulnerable Areas, Especially behind Defence Works, "Hessisches Ried" Case Study. Katzenmaier, D., A. Bronstert, U. Fritsch and C. Bismuth: Quantification of the Influence of the Land Surface and River Training on Flood Discharge in the Rhine Basin. Leenders, P. H. J. A. and George G. v. d. Meulen: Polder Evacuation and Emergency Provision Maas & Waal- and Ooy-polder in the Netherlands and Germany. Schulte-Wülwer-Leidig, A.: The ICPR Action Plan for Floods. Webler, H.: Dike Relocation at Worms-Bürgerweide. Lang, T. and F. Toensmann: Preventive Flood Control in the Catchment Area of the Lahn River in Hesse – an IRMA-Project. Bauer, Ch. and F. Toensmann: Retention Increasing Measures in the Flood Plains of the Lahn River. Böhm, H. R. and P. Heiland: Spatial Planning Instruments to Improve River Flood Prevention and Awareness. Dapp, K.: Spatial Planning in the Course of River-Flood-Prevention – Examples of the Hessian Lahn. Lammersen, R. and H. Engel: The Projects "Preventive Flood Protection in the Catchment of the Lahn River" and "LAHoR", Contributions to the Action Plan on Flood Defence of the ICPR. Maniak, U. and H. Voermanek: Efficiency of Different Measures for Flood Protection in the Catchment of the Lahn.

### **SECTION I: EXPO 2000 SESSION**

Toensmann, F., B. Kühne and K. Röttcher: Environmentally Sound Flood Defence in Northern Hesse: A worldwide Project of the World Exhibition in Hanover (EXPO 2000). Sauerwein, B. and F. Toensmann: Environmental Impact Assessments for Central and De-Centralised Flood Defence Measures by the Example of the Flood Defence Concept for the Bauna Brook in Hesse. Röttcher, K. and F. Toensmann: Highlighting the Potentialities and Limitations of a Decentralised Flood Defence Approach by the Example of the Case Study "Bauna."

## **SECTION K: POSTERS**

Elsener, J.: Transnational Atlas of the Flood Plains in the Catchment Area of the River Mosel. Staatliches Umweltamt Köln: Flood Plain Siegburg-Kaldauen. Lang, T. and F. Toensmann: Preventive Flood Control in the Catchment Area of the Lahn River in Hesse. Kron, A.: Mobile Flood Protection.

## **VOLUME 3**

### **Supplement to Section G:**

Gorji-Bandpy, M.: The Joint Probability Method of Determining the Flood Return Period of a Tidally Affected Pond.

### **WORKSHOP 'Pollutants and Disease Pathogens in Floods'**

Braun, M.: The Pathways for the Most Important Hazardous Substances in the Rhine Basin (During Floods). Kramer, A., F.-A. Pitten, P. Rudolph and H. Below: Health Risks during and after High Flood Events and Hygienic Consequences. Krüger, F., H. Rupp, M. Lohse, O. Büttner, K. Friese, R. Meissner and G. Miehlich: Geochemical Characterisation of Elbe River High Flood Sediments. Mayer, R.: The Significance of Soil Protection Legislation for the Protection of Waters and of the Aquatic Ecosystems. Symader, W.: Changes in Water Quality During Flood Waves in Small Mountainous River Basins. Winkler, M., M. Barowski and W. v. Tümpling jr.: Investigation to Describe the Dynamics of Contamination with Heavy Metals and Organic Pollutants in Relation to Suspended Particulate Matter during Flood Events. Westrich, B.: Particulate Pollutents in Surface Waters. Borchardt, D.: Pollutants and Disease Pathogens in Floods-Workshop Summary.

### **Supplement to Posters K:**

Giesecke, J., W. Marx, F. Kerle and H. Gittinger: Hydraulic Simulation and Flood Protection in the River Basins of Kocher and Jagst, Germany.

### **Symposium and Field Trip**

Toensmann, F.: Conference Report of the International Symposium on Flood Defence in Kassel, September 2000. Roettcher, K.: The Field Trip on the Occasion of the International Symposium on Flood Defence, Kassel, September 2000

**ISBN-Nr.: 3-930150-20-4**
