	18:15–21:00	Common dinner, at Alnarps Agroecology Farm or in a restaurant
05 September Friday		Departure

*Teaching Material collection: We think it will also be good to collect teaching and learning materials related to organic agriculture from across Europe as part of this meeting. The idea is that each ENOAT member brings one or two useful resources to share with the group, such as infographics, tables, videos, podcasts, texts, new books, or assignments.

This will help teachers (who are not yet) teaching organic food and farming to discover freely available materials and get inspired. If everyone contributes just a couple of their favorite resources (with links, if possible), it would not be much work for anyone, but together we can build a valuable collection.

We plan to share the full list, either by uploading it to the ENOAT website or by distributing an Excel file via email.

At the ENOAT meeting, each participant will briefly present their materials in a 1-minute "elevator pitch."
