WE ACT TOGETHER –

Conserving Energy to Protect the Climate

Everybody’s contribution counts! We all have to actively work towards conserving energy so the university can stay open as a space of teaching and studying. On top, we also protect the climate!

„We all“ is also written in sign language at the top of the Studihouses’ roof. The art project stands for diversity, acceptance, multiculturalism, and universal communication.
IT IS IN OUR HANDS –
Our Setting for Energy Conservation

1°C less conserves 6% of energy!

✓ Set the thermostat to slightly below 3 = 19°C
✓ Do not use portable heaters
✓ Close doors
✓ To air out your room, open the windows fully for short periods of time
✓ Do not heat staircases, hallways, and entrance halls

You can find many more practical ideas on energy conservation in our checklists for offices and other room types!

A University of Kassel campaign to promote energy conservation: We act together – conserve energy to protect the climate
A SMALL PUSH FOR YOU, 10% MORE ENERGY FOR EVERYBODY –

Collectively conserving energy on campus

✓ Switching off computers
✓ Turning off the lights
✓ Saying goodbye to standby mode
✓ Disconnecting phones from the power grid after charging
✓ Using the stairs instead of the elevator
✓ Selective printing

You can find many more practical ideas on energy conservation in our checklists for offices and other room types!
There are lots of ways to adapt your personal transportation to be more sustainable and save energy at the same time:

- Switching to biking
- Using university tickets, like the Semester- and Landesticket
- Using car pooling
- Using stairs instead of elevators
- Video calls instead of business travel
